

Mini ABiS™

Introduction

Product: Air Bag Isolation Tool

Pipe Size & Schedule: All sizes and schedules

Size Range: 2" - 4" (38mm – 110mm)

The IK ABiS™ isolation system has been designed for isolation purposes when welding on hydrocarbon systems. It incorporates the functions of a double block & bleed barrier (DB&B) whilst constantly purging and monitoring the inert gas between the 2 barriers.

General Function and Application

- Double Block & Bleed function (DBB)
- Central Bypass facility to vent gasses
- Operates in multiple pipe sizes
- Navigates through bends and reducers
- Provides a safe working environment with an integrated LEL alarm function
- Operates with 6 independent controllable lines
