Pipe Orientation: Any

Negotiate bends: Yes

Means of installation/Removal: Mechanical means (Push/Pull)

Means of activating: Hydraulic (Water)

The Multi Plug or Twin-Tyred Flexible Isolation Plug's main function is to provide a double block & bleed (DB&B™) isolation with by-pass or inert gas purge function during welding. This tool will provide the user with the possibility for weld isolation past bends due to the flexible by-pass connection hose.
